Hand and Eye Protection Specifically Chosen

Warehouse & Logistics

Hand and eye protection to keep your workforce productive

We have been manufacturing and supplying specialist hand protection for over 60 years. Our work gloves and safety eyewear are used extensively throughout the warehousing and logistics sector where we've developed many long-standing client relationships.

Working closely with the industry to understand their specific needs has enabled us to gain a clear insight. Research and development have enabled us to refine our product specifically for a range of challenges unique to the sector.

This guide focuses on four products which have been championed by our clients and identified as essential PPE within their operation. They represent a cross-section of our range, each offering a set of unique properties designed to provide protection and increase efficiency within warehouse and logistic operations.

We work in partnership with our clients to provide cost-effective solutions and maximises operation productivity.

We're very proud of our long history as market leaders, supported with expert knowledge and decades of experience as hand protection specialists.
